

Template solution

Jakub Kuzilek

How to start

1. Install Docker desktop (<https://www.docker.com/get-started>)
2. Get project from Gitlab (per group):
 1. Fork project from: <https://gitlab.informatik.hu-berlin.de/kuzilekj/la-dashboards-course>
 2. Add all team members to the project
 3. Add kuzilekj as maintainer to your project
3. Clone the git project to your local machine
4. Run in folder: docker compose up

Required versions:

- Docker Engine 20.10.7 or higher
- Docker Compose 1.29.2 or higher
